

# How You Can Have Whiter, Straighter, Healthier Teeth And Finally Smile With Confidence!!!

## In This Confidential Free Report You Will Discover:

- How you can have a Whiter, More Confident, Attractive smile quickly and easily without metal braces
- The harsh reality about crooked teeth that most people don't know!
- The truth about your smile and how to get more respect, impress others, and look more attractive
- How you can easily take care of stained teeth and have a whiter smile using your aligners!
- And Much More!!

### It's Unfair, But True.

See, we all want to be attractive. We can dress up and get your hair and make-up done just right. Yet one of the first things people notice, the one thing that makes a lasting impression, is **your smile!**

Without a great smile you just don't look your best! I guarantee it!

Many people are unaware of how much of an impact their smile makes when being introduced to people, the level of respect they are given, or even how it can affect their relationship with their spouse or significant other.

If you are reading this letter, I'm guessing you are experiencing one of these problems or situations:

1. Stained or discolored teeth
2. Worn teeth
3. A crooked smile
4. Or you really like your smile, but you know it can be even more beautiful

If you fit into any of these categories, I can help you!

I have provided this report to educate people, like yourself, who want to improve their smile and don't know what questions to ask, what procedures are available to them, and don't know that with the advancements in technology that you can turn your smile into a "Hollywood" smile within a short amount of time.

- **Did you know that having crooked teeth can cause them to function improperly?** Our body was made to work together in synergy. When teeth are crooked, they can become worn down, and sensitivity and chipping can occur. Also more stress is placed on certain areas that usually can't handle

these forces. This can result in periodontal disease and erosion of the supporting bone. Not a good scenario.

- ***Did you know there are several ways to improve your smile whether they are crooked and/or discolored?***
- ***Did you know we have the technology available to straighten those crooked teeth without metal braces?***

It's true. This technology is called **Invisalign**. It consists of a series of plastic trays called aligners. They look similar to whitening trays that most people have at home. Every 2 weeks you change into your new aligners. Each aligner moves the crooked teeth ever-so-slightly until after a set amount of months and then- **WOW**- your teeth are straight. Keep reading for my special offer at the end of this report!

Your next question is- "How much does this wonderful technology cost?" In the interest of making Invisalign affordable, we offer this new technology at the same price as regular braces. My philosophy is to give as many people as possible the chance to have a more attractive smile that will last a lifetime.

### **The Truth about Your Smile and How to Get More Respect, Impress Others, and Look More Attractive**

Let's face it, we always want to be the best we can be. We know that if we take care of ourselves that we feel better, more energetic, and have high confidence in what we do. We can also agree that when we look good, others are attracted to us.

I can't tell you how many people come to our office and ask me to fix or improve their smile before a special occasion- whether it's a wedding, a vacation, or a graduation. I love seeing people leave my office with a whiter, brighter, straighter smile. My question is- "Why don't you do something now to fix your smile? Why do you wait for a special occasion to feel great about your teeth?" Well now, you don't have to wait for that one-in-a-million special day, you can improve your smile today! We have a special financing program that can make your life so much easier! Ask us about our Care Credit program.

### **How You Can Easily Take Care of Stained Teeth and Have a Whiter Smile Using Your Aligners!**

Not only can the invisalign aligners straighten your teeth without braces, the aligners can also be used as a whitening tray. Now we can kill 2 birds with one stone! You can whiten, brighten, and straighten your teeth all at once! Then after your teeth are straightened, you can use your last aligner to touch up your smile when it's not as bright as you want it to be! Isn't that a deal! Usually whitening trays can cost as much as \$400! Now we have the technology that can straighten and whiten all at the same time! And now you have the chance to boost your confidence and improve your smile without people even knowing what you're doing!

## UGH! Gum Disease

Improving your smile also may improve your health. Did you know that 4 out of 5 people are walking around with the worst silent killer of teeth and it's called periodontal disease (aka gum disease)? Did you know that gum disease has been linked to heart disease? Food particles trapped between the teeth cause the bacteria in your mouth to propagate and release toxins that cause the gums to become inflamed and bleed. These toxins enter the blood stream and may be associated with disease involving the heart and blood vessels. Flossing can keep this under control. However, many people don't floss because their teeth are so crooked that they are unable to floss properly. But when crowded crooked teeth are straightened with invisalign, the floss can glide through those teeth like silk. And the gums become healthier and stronger for years and years to come. So why wouldn't you want to improve your teeth, your smile, and your gums all at the same time?

You see, I'm so confident that you'll want to come and straighten your teeth with invisalign that I'm giving you an added bonus! If you qualify for invisalign, I will give you a whitening kit for free! **Yes FREE!** You will have the opportunity to straighten and whiten your teeth at the same time! Call our office today @ **732-530-5111** and take the first step toward having the smile you truly deserve!

Thank you very much for reading this report. I hope it was helpful. If you have any questions- or if you'd like to schedule a **FREE INVISALIGN CONSULTATION**, please call us right now and set up your appointment.
